Received December 6, 2021

**Abstract** On the occasion of 95 anniversary of outstanding seismologist Nikolai Vissarionovich Shebalin some topics of his professional activity and achievements are observed. It concerns mainly with macroseismic approaches, compilation of seismic catalogues and seismic hazard assessment. Shebalin's heritage in these fields of seismology seems to be valuable. Some author's sentences and remembers are added as well.

**Keywords** Shebalin Nikolai Vissarionovich, seismology, macroseismics, macroseismic field, seismic catalogs, seismic scale, focus of earthquake.
