

## Границы сейсмоактивных регионов России с 2004 г.

**Изменены границы регионов: 01.01.2006 г. – «Северо-Восток России и Чукотка»  
и «Камчатка и Командорские острова»; 01.01.2012 г. и 01.01.2022 г. – «Северный Кавказ»;  
01.01.2015 г. – «Курило-Охотский регион»; 01.01.2017 г. – «Арктика»;  
01.01.2017 г. и 01.01.2022 г. – внешние границы, 01.01.2018 г. – внутренние границы  
региона «Восточно-Европейская платформа, Урал и Западная Сибирь».  
01.01.2022 г. добавлен «Крымско-Черноморский регион»**

| №  | Регион,<br>территория                                                         | Географические координаты углов контуров регионов<br>(широта N – долгота E, град.)             |                                                                                         |                                                                                         |                                                                                  |                                                                    |
